

برامج تطبيقات الهندسة البترولية وعمليات الانتاج والشحن والتصدير

Sl.	COURSE TITLE
1	أساسيات إقتصاديات البترول
2	التآكل في الصناعات البترولية وطرق الحماية
3	تكنولوجيا البترول
4	Petroleum Engineering Workshop
5	Basic Petroleum Exploration and Production for Non- Specialists
6	Corrosion Control in Petroleum and Petrochemical Industries
7	Well log interpretation
8	Production Quality & Process Troubleshooting
9	Casing, Cementing Design and Operation
10	HSE Risk Assessment Program Implementation
11	Process Control, Troubleshooting & Problem Solving
12	Acidizing Applications in Sandstones and Carbonates
13	Dynamic Pressure Drilling
14	Amine Gas Sweetening and Sulphur Recovery
15	Atmospheric Residue De-Sulfurization Technology
16	Centrifugal Pump Selection, Construction, Operation, Maintenance, Repair & Troubleshooting
17	Process Equipment, Application, Design and Operation
18	Process Plant Start-up Commissioning & Troubleshooting
19	Boiler & steam generation system
20	Well Integrity – Life of the Well
